OBJECTIVE

Aspiring AI/ML Engineer and Data Science enthusiast with expertise in Python, Machine Learning, and Data Analysis. Eager to leverage analytical and problem-solving skills to develop impactful AI solutions while continuously learning and growing in the field of Artificial Intelligence.

TECHNICAL SKILLS

- **Programming Languages:** C++, Python.
- **Machine Learning & Deep Learning:** Linear Regression, Logistic Regression, Decision Tree, Random Forest, K-Nearest Neighbors (KNN), Support Vector Machine (SVM), K-Means Clustering.
- **Deep Learning:** Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Recurrent Neural Networks (RNN).
- **Libraries & Frameworks:** NumPy, Pandas, Scikit-learn, Tensorflow, Keras, Matplotlib, Seaborn.
- **Data Analysis & Visualization:** Data Cleaning, Feature Engineering, Feature Scaling, Label Encoding, One-Hot Encoding, Model Evaluation.
- **Databases:** MySQL, MongoDB.
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Google Colab, Docker.

PROJECTS

Invoice Intelligent System | Python, Pandas, NumPy, Scikit-learn | [Link: Invoice-intelligent-system](#)

- Developed an intelligent invoice processing system for automated invoice analysis and prediction.
- Performed data cleaning, preprocessing, feature engineering, and exploratory data analysis.
- Trained and evaluated multiple machine learning algorithms to identify the best-performing model.
- Achieved optimal prediction accuracy using Regression techniques and generated structured invoice insights.

Customer Churn Prediction Using ANN | Python, TensorFlow, Keras, Pandas, NumPy | [GitHub](#)

- Developed a customer churn prediction model using Artificial Neural Networks (ANN).
- Performed data preprocessing, feature scaling, encoding, and exploratory data analysis.
- Designed and trained a multi-layer neural network using TensorFlow and Keras.
- Achieved accurate churn predictions to support customer retention and business decision-making.

Movie Recommendation System | Python, NLP, Pandas, Scikit-learn | [GitHub](#)

- Developed a content-based movie recommendation system using NLP and Machine Learning techniques.
- Performed data cleaning, text preprocessing, and feature extraction on movie datasets.
- Applied TF-IDF Vectorization and Cosine Similarity to identify and recommend similar movies.
- Built a recommendation engine capable of generating personalized movie suggestions based on content similarity.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering

Aravali College of Engineering and Management | 2025 – 2028 (Expected)

Diploma in Computer Science Engineering

Accurate Institute of Polytechnic, Greater Noida | 2023 – 2025 Percentage: 74%

EXPERIENCE

Web Developer Intern | IBEM Solutions LLP | Sep 2024 – Dec 2024

- Developed and customized websites using WordPress and REACTJS.
- Collaborated with teams to deliver client-focused web solutions.
